UXDLAB SOFTWARE PVT LTD.

Frontend Developer

August/2022 - January/2023

- Specializing in designing and developing interactive websites, with a focus on creating frontend solutions for delivery-based web applications. My expertise lies in utilizing cutting-edge tools and technologies such as Angular, React, JavaScript, TypeScript, Jira, GitHub, Bootstrap, Angular Material, and Prime NG.
- Design & developed responsive web application with crud operation, rating, login and signup, google map api, integration in VELL DONE DASHBOARD AND WEBSITE.
- Design & developed responsive web application with rating, login and signup, google map api, integration in NAMITA THEATRE WEBSITE.
- Design & developed responsive web application with google map api, integration in MIDTOWNMANHATTANPSYCHIC WEBSITE (<https://midtownmanhattanpsychic.com/>).
- TRAVELBEE DASHBOARD (Team Size: 5 team members, Role: Frontend Developer) Description: Collaborated with a cross-functional team to redesign a complex ecommerce website to enhance user experience and boost sales. Responsibilities: Led the development of the website's frontend using Angular, Angular Material, ensuring responsive design and improved user interfaces. Coordinated team tasks, managed timelines, and facilitated effective communication among team members. Worked closely with the UX/UI designer to implement design improvements and optimize the user flow.
